

COLOURFUL EASTER BUNNIES MADE FROM FABRIC

Step-by-step instructions

1. Fold the material in two, placing the outer sides of the fabric on the inside. After you have cut out the cutting pattern, tack it to the fabric using pins. Now draw 1 cm around the seam allowances. Now cut the doubled fabric along the seam allowance so that you have two cut-out bunnies.
2. Tack the bunnies together using pins. Please note: The outer sides of the fabric must lie on the inside. Now stitch around the fabric. Leave an opening of approx. 10 cm at the bottom so that you can fill the bunny with fibrefill later on when you have turned it inside out.
3. Now cut both pieces of fabric in short, careful cuts around all curves and difficult edges. This will ensure that the seam allowance looks nicer along the sewn shape after you have turned it inside out.
4. Now turn the bunny inside out. A wooden spoon can be helpful when turning the tiny ears inside out.
5. Now fill your bunny with fibrefill. A wooden spoon may come in handy when filling the ears. You can either sew the opening shut by hand with a sewing needle or a sewing machine.

We hope you have plenty of fun sewing and decorating!

! Our tip for you:

If you simply want to use the bunny as a decoration, we recommend sewing a small sack of sand or a larger stone into it to stabilise it.
